

# AHMED IBRAHEEM AHMED

FULLSTACK DEVELOPER

## Professional Summary

A passionate Full-Stack Web Developer specializing in the MERN stack and Django for backend development, with hands-on experience in building dynamic and scalable web applications. Eager to join a dynamic tech team where I can apply my problem-solving skills to build innovative solutions that directly contribute to the company's growth.

## Internships

### FullStack MEARN at INFORMATION TECHNOLOGY INSTITUTE ( ITI ), QENA

July 2025 - Present • [↗](#)

- Developed foundational full-stack capabilities, building functional web applications using the MERN/MEAN stack (Node.js, Express, React/Angular, MongoDB), and creating responsive user interfaces with HTML5, CSS3, and Bootstrap.

## Education

### Bachelor's degree in Commerce at SOUTH VALLEY UNIVERSITY , QENA

January 2018 - June 2022

Grade: GOOD

## Projects

### Fruit-Store-React • [↗](#)

The app contains the standard e-commerce store features and uses fruits as example products (with fun fruit emojis). Users can easily browse, search, view detailed product info, add products to bag...

### A website with advanced html and css • [↗](#)

A responsive multi-section landing page built with HTML5 and CSS3 (with Normalize.css and Font Awesome). This project focuses on modern layout techniques (Flexbox/Grid), reusable components, and clean UI sections.

### PlayBlocks - Game Website • [↗](#)

PlayBlocks is our first project as part of the ITI (Information Technology Institute) training program. It is a browser-based game discovery website created entirely using HTML, CSS, and JavaScript.

### Frontend-From-Scratch (No Frame-Work) • [↗](#)

This is my first project using JavaScript. In this project, I created an interactive webpage where users can click buttons, view dynamic content, and see real-time updates. It helped me get comfortable with JavaScript basics like DOM manipulation and event handling.

### Bootstrap-Design • [↗](#)

### Dashboard • [↗](#)

Admin Dashboard using ONLY HTML, CSS, and Vanilla JavaScript (no frameworks, no libraries)
